computer technology company called AK Techotel. A few years later once she gained enough business experience while living and sharing her time equally between [Copenhagen, Denmark](#) and [Stockholm, Sweden](#) and setting up business all over [Europe](#) including [England, Germany, France](#) and [Italy](#). Papp decided to pursue her career in [New York City](#), and after relocating in the U.S., started a business with an Irish investor. She built and managed an International Consulting firm in New York City in the fields of health and beauty, high-technology, marketing communication, finance, joint ventures, investment banking, and entertainment financial consulting.

Papp's companies, Adrienne Papp, Spotlight Media Productions, Atlantic Publicity, AtlanticUnitedFilms and Atlantic Publisher, are collectively referred to as Atlantic Publicity. They are media communication companies based in Los Angeles, New York and Aspen. Papp continued collecting various diplomas and post graduation papers into her late 30's.

Papp was an exceptional student at Ferenc Foldes High School, the best-regarded schools in Hungary, and was also known for her cheerful disposition, outgoing approach to life, and love of poetry. At Ferenc Foldes she also developed a love for the theater and directed, produced and acted in plays that were performed nationwide. After graduating, Papp was accepted to prestigious [Karl Marx University of Economics](#) (today called Corvinus University of Budapest). Five years later she graduated with honors, with majors in Economics and Marketing. Her minor was International Traffic, Transportation and Logistics, studies that later served as the platform for on-time management and international logistics for companies including DHL and FedEx. Papp was also offered an honorary Ph.D. for her extensive work in transportation logistics, an altogether new field, and her innovative and unique research studies remain on file in the University library under her authorship serving current and upcoming generations. Papp also discovered an innovative mathematical formula in the relatively new field of Informational Technology in both Fortran and Pascal languages.

Adrienne is a regular guest on the radio show called *People of Distinction* airing on WomensRadio and on Live365.

## We are Still on the Edge of the Cliff..

The policy being considered on the agenda by our Congressmen as a result of "dodging" the fiscal cliff is even worse than the previous problem. Tax Reform is next. The proposed legislation being offered by the economic gurus is similar to the policy that is in force in Greece and Portugal. Their answer to a bad economy is to balance the budget, which is the wrong answer. It will shrink the economy, making everything worse. Greece, Portugal, and Spain, as their populations are dying on the steps of hospitals, and committing suicide, along with the other European nations, make their payments to the European banking system. The Trans-Atlantic banking system is buried in debt created by speculation, based on no productivity. This multi-trillion dollar derivative debt will never be paid, and more importantly, it represents no productive activity.

As America loses our farmers, our manufacturing, and firemen, and educators, all of which are vital to the preservation of our way of life, and as we lose our Social Security and Medicare benefits, we must as citizens confront the fact that these functions must be supported by public policy. Tax reform must be considered according to the principles of the US Constitution . . . the common defense, domestic tranquility, and the general welfare of the population. We need to restore our physical economy, and then, after we consider the nature and importance of this debt, we can THINK about balancing the budget. But speculative debt SHOULD NOT COME FIRST. There is no future in that scenario. This "solution" won't even pay the speculative debt, and it will ruin everyone's ability to pay for anything.

There is a better way, and we have people in Washington D.C. that understand the process that will work. It involves a 3-point process.
